

Viewing Your Goal Performance

Blackboard Learn

Goals are competencies that your instructor connects to course assessments to evaluate your skill mastery within specific areas. Students may review their goal performance through the Goal Performance tool within a course. They may also view their goal performance over time using Blackboard's Goal Performance Dashboard.

How to Access the Goal Performance Tool

To view how you performed against a goal in a current course, use the course menu's *Goal Performance* tool. If you do not see this tool in your course, contact your instructor.

Once you click on this tool, you will see a page that lists goals that are aligned to assessments in the course and your average score based upon these assessments. This score relates to your grades in the course.

Goal Performance

How to Access the Goal Performance Dashboard

If desired, you may view your cumulative goal progress across courses and over time through the **Goal Performance Dashboard** tool in the **My Blackboard global navigation**. This tool is available to students who are enrolled in at least one course. The tool updates every 24 hours with data collected from the student's courses with goal-aligned assessments.

1. When logged into Blackboard, click the **name** in the **top-right corner** of the screen.
2. In the menu that appears, select **Tools**. Then, click **Goal Performance**.

3. The Goal Performance dashboard will appear and display your average performance on assessments aligned to goals in your courses. Clicking on a goal will display the courses that are contributing to the averaged goal score.

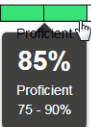

Goal Performance

This dashboard calculates your performance on all assessments as they relate to broader goals. Results are calculated for the highest goal, but you can select each smaller goal to learn more about it. You can also see which courses were included in the goal assessment.

If a course aligned to a goal is still available to students, you will be able to click on a course link to view a course and grades in greater detail. Students **will not** be able to access courses that are no longer available.
